

# ExamBoosts

## Pass Your Next Certification Exam Fast!

Everything you need to prepare, learn & pass your certification exam easily.

365 days free updates. First attempt guaranteed success.

15+  
YEARS IN BUSINESS

53697+  
SUCCESSFUL CASES

53207+  
SATISFIED CLIENTS

53297+  
THE NUMBER OF CONSULTING

## TRY BEFORE YOU BUY

Download a free sample of any of our exam questions and answers

- ✓ 24/7 customer support, Secure shopping site
- ✓ Free One year updates to match real exam scenarios
- ✓ If you failed your exam after buying our products we will refund the full amount back to you.

-  **365 Days Free Updates**  
Free update is available within 365 days after your purchase. After 365 days, you will get 50% discounts for updating.
-  **Security & Privacy**  
We respect customer privacy. We use McAfee's security service to provide you with utmost security for your personal information & peace of mind.
-  **Instant Download**  
After Payment, our system will send you the products you purchase in mailbox in a minute after payment. If not received within 2 hours, please contact us.
-  **Money Back Guarantee**  
Full refund if you fail the corresponding exam in 60 days after purchasing. And Free get any another product.

Reliable & Efficient Test Practice Questions to Satisfy All Candidates

**Exam** : **H13-821\_V2.0**

**Title** : **HCIP-Cloud Service Solutions  
Architect V2.0**

**Vendor** : **Huawei**

**Version** : **DEMO**

**NO.1** NIST (National Institute of Standards and Technology, National Institute of Standards and Technology) summarizes PaaS as an application-oriented core platform. From the perspective of function definition and core value, what features does PaaS have? (Multiple choice)

- A. Including computing services, storage services and network services, etc.
- B. Provide standardized programming frameworks and services to enable continuous development and integration
- C. Automatically obtain cloud resources for application deployment
- D. Application automation operation and maintenance (including configuration, upgrade, scaling, etc.) without perception of underlying resources

**Answer:** B,C,D

**NO.2** Which of the following options is not the core advantage of Huawei Cloud Gene Container Solution?

- A. Automated gene sequencing analysis, sincerely light the pressure of operation and maintenance
- B. Flexible CPU and memory ratio to reduce costs
- C. Provide file storage capacity
- D. Fine-grained resource monitoring and billing to facilitate customers' internal settlement

**Answer:** C

**NO.3** The distributed transaction model strategy of the DDM logic library is eventual consistency. What will DDM do if the application fails to submit fragments?

- A. DDM will automatically compensate, and the reverse operation will roll back the successfully committed transactions on the shards that commit successfully.
- B. DDM will refuse to execute and return an error
- C. No transaction compensation is provided, so there will be partial execution success and partial execution failure
- D. The client is required to send a rollback to roll back the successfully committed transaction on the shard that has been committed successfully.

**Answer:** A

**NO.4** Which of the following is a product provided by Huawei on the side of IoT terminal equipment?

- A. Chip
- B. Module
- C. Development board
- D. Smart devices

**Answer:** A

**NO.5** What are the advantages of microservices? (Multiple choice)

- A. Microservices are a silver bullet, suitable for various business scenarios
- B. Lightweight protocol, HTTP protocol communication can be used
- C. The architecture can be flexibly extended
- D. Different technology stacks can be used to build services

**Answer:** B,C,D

**NO.6** In the Internet of Vehicles scenario, Kafka provides parallel access capabilities for large-scale data, but also provides peak shaving capabilities for the back-end real-time computing framework during the morning and evening peak periods.

- A. True
- B. False

**Answer:** A

**NO.7** Which challenges do the application switching middleware solutions mainly respond to? (Multiple choice)

- A. Poor performance and insufficient capacity expansion
- B. High cost of self-operation and maintenance
- C. Manual deployment of the business, low efficiency, high error rate
- D. Insufficient open source version of high availability

**Answer:** A,B,D

**NO.8** Under the same specifications, which of the following types of elastic cloud server instances have the strongest computing performance?

- A. H3
- B. T6
- C. C6
- D. S6

**Answer:** A

**NO.9** If the enterprise develops or maintains middleware itself, the enterprise needs to handle the installation and deployment of software and hardware, faults and maintenance, and bug fixes, if it uses the cloud middleware service, it can be used out of the box.

- A. True
- B. False

**Answer:** A

**NO.10** If an enterprise develops or directly uses open source middleware, it needs to solve hardware failures, software installation and deployment, middleware software bugs and security repairs independently, and requires a lot of manpower.

- A. True
- B. False

**Answer:** A

**NO.11** When a business needs high availability, high reliability, but it is also a large-capacity, high concurrent data cache, then which type of Huawei cloud Distributed Cache DCS services should be selected by the application?

- A. Active and standby
- B. None of the above
- C. Cluster

D. Stand-alone

**Answer:** C

**NO.12** Which of the following features does the HUAWEI CLOUD bastion host service support? (Multiple choice)

A. Linux command audit

B. Host account management

C. Operation and maintenance personnel account and authority management

D. Firewall security incident management

**Answer:** A,B,C

**NO.13** The goal of smart park construction is to achieve full connectivity, full integration, and full intelligence in the park.

A. True

B. False

**Answer:** A

**NO.14** Which of the following scenarios are typical application scenarios of DMS? (Multiple choice)

A. Log transfer

B. Push notifications

C. Report generation

D. Handling user upload tasks

**Answer:** A,B,C,D

**NO.15** Which of the following scenarios can the GES service be applied to? (Multiple choice)

A. Link prediction

B. Recommended by friends

C. Real-time recommendation

D. Individual value discovery

**Answer:** A,B,C,D

**NO.16** What are the benefits of the microservices architecture? (Multiple choice)

A. Allow for technical diversity: With microservices, you can mix multiple programming languages, development frameworks and data storage technologies.

B. Simple operation and maintenance: stateless, self-service operation and maintenance make the system do not need a mature operation and maintenance team (mechanism). Significant cost savings

C. Support independent deployment: Simple services are easier to deploy, because the service is autonomous, and it will not cause a system crash after a problem occurs.

D. The boundaries of the service module are clearer: Microservices emphasize modular structure (REST interface calls), which is very important for large teams.

**Answer:** A,C,D

**NO.17** What types of document reviews are supported by content review? (Multiple choice)

- A. Short video
- B. Text
- C. Picture
- D. ZIP archive

**Answer:** A,B,C

**NO.18** Which of the following are part of Huawei three-dimensional operation and maintenance solution? (Multiple choice)

- A. Application layer operation and maintenance
- B. Business analysis
- C. Infrastructure layer operation and maintenance
- D. Application performance analysis

**Answer:** A,B,C,D

**NO.19** Which of the following are the main features of NB-IOT? (Multiple choice)

- A. Ultra-low cost
- B. Super coverage
- C. Ultra-low power consumption
- D. Large connection

**Answer:** A,B,C,D

**NO.20** Which of the following options are the main features of the serverless architecture? (Multiple choice)

- A. NoOps
- B. Event-driven model
- C. Service-level automatic elastic scaling
- D. Functions are generally stateless and idempotent

**Answer:** B,C,D

**NO.21** The microservice engine provides a series of out-of-the-box microservice governance capabilities, such as automatic fault tolerance, service failure level, service current limit and automatic disaster tolerance.

- A. True
- B. False

**Answer:** A

**NO.22** Which of the following scenarios is not a typical application of edge computing in typical industrial manufacturing?

- A. Manufacturing business management
- B. System conversion of edge data acquisition protocol
- C. Flexible testing (such as product flexible quality, matching of similar production lines, etc.)
- D. Predictive maintenance of high-value equipment

**Answer:** A

**NO.23** What challenges will the microservices architecture face?

- A. The inevitable extension of the delivery cycle
- B. Partitioned database architecture. Data consistency is difficult to guarantee
- C. Function involves multiple modules. It is not convenient to test
- D. Distributed systems. High complexity

**Answer:** B,C,D

**NO.24** Which of the following options is the correct process for enterprises to go to the cloud?

- A. Design>Planning>Implementation>Verification>Delivery
- B. Planning>design>implementation>verification>delivery
- C. Planning>Design>Delivery>Verification>Implementation
- D. Planning>Design>Verification>Implementation>Delivery

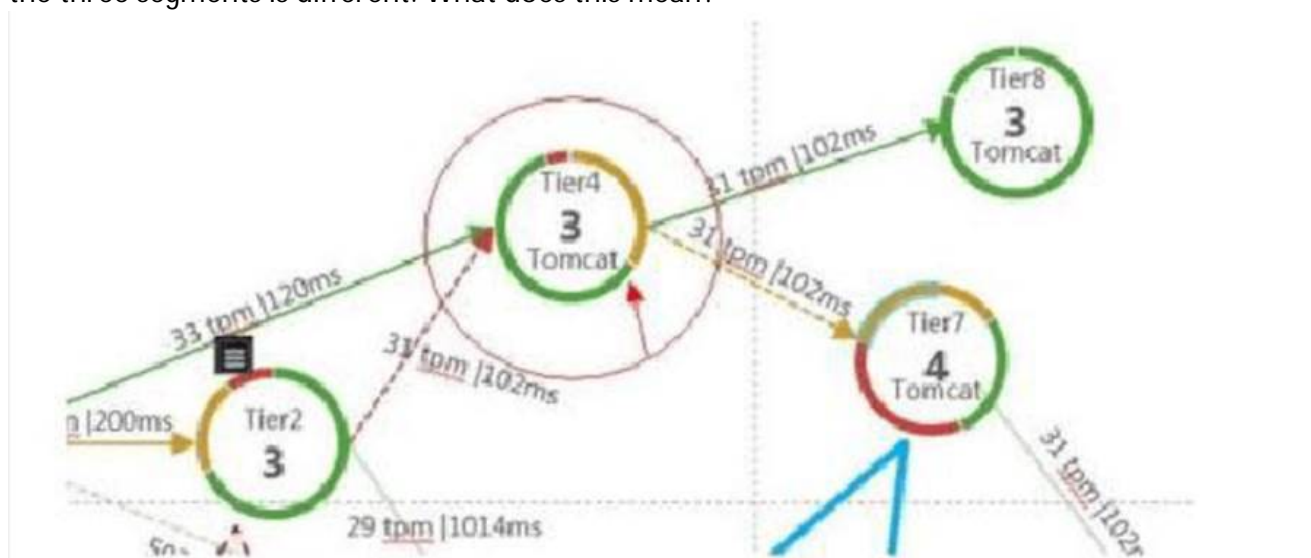

**Answer:** D

**NO.25** Gartner believes that microservices will become mainstream in the future. Which are the core objectives of the microservices architecture? (Multiple Choice)

- A. Online Request Tracing
- B. Precise scalability
- C. Flexible flexibility (deployment flexibility)
- D. Development agility

**Answer:** B,C,D

**NO.26** On the topological diagram of HUAWEI CLOUD Application Operation and Maintenance, as shown by the arrow in the figure below, the circle is divided into three segments, but the length of the three segments is different. What does this mean?

- A. The microservice was called three times
- B. There are three Tomcat instances, but the load is uneven among the instances
- C. All instances of the service have failures, and the number of failures is different
- D. Three faults are monitored

**Answer:** B

**NO.27** Which of the following options can implement offline VMware virtualization environment backup data to the cloud?

- A. Cloud backup service CBR
- B. Cloud server backup CSBS
- C. Dedicated distributed storage service DSS
- D. Cloud hard disk service EVS

**Answer:** A

**NO.28** A customer's business needs to use Oracle RAC cluster. Which method is recommended to build a commercial environment?

- A. Elastic Cloud Container Engine CCE
- B. Bare Metal Service BMS
- C. Elastic Cloud Server ECS
- D. Dedicated hosting service DEH

**Answer:** B

**NO.29** Which of the following contents cannot be restored through the database recycle bin for HUAWEI CLOUD tenants?

- A. Instance version information
- B. User password
- C. Back up data
- D. Instance disk information

**Answer:** B

**NO.30** In the Internet identity verification scenario, which of the following can be used to prevent cheating attacks?

- A. Face search
- B. Live detection
- C. Face comparison
- D. Face database management

**Answer:** C

**NO.31** What are the characteristics of HUAWEI CLOUD Knowledge Graph? (Multiple choice)

- A. Supporting information is the map construction process of extraction, knowledge mapping, and multi-source fusion, supporting incremental update and volume update
- B. For downstream applications, provide convenient interfaces and services such as knowledge map publishing, query visualization, etc.
- C. Provide visual ontology design tools
- D. Based on self-developed GES service, excellent storage and query performance

**Answer:** A,B,C,D

**NO.32** Which of the following options are the main challenges facing general e-commerce platforms? (Multiple choice)

- A. Security is difficult to guarantee
- B. Poor user experience
- C. Responding to the high risk of business surges
- D. Lack of data support for business decisions

**Answer:** A,B,C,D

**NO.33** Huawei Cloud Distributed Database Middleware DDM service as ( ) pre-distributed distributed database access service.

- A. Oracle
- B. DMS
- C. RDS
- D. DCS

**Answer:** C

**NO.34** Which of the following are the advantages of building industry solutions based on the HiLens platform? (Multiple choice)

- A. Low cost
- B. Fast deployment
- C. Protection of privacy
- D. Short integration cycle

**Answer:** A,B,D

**NO.35** Huawei CSE supports multi-language micro-service access and interworking. The supported languages include? (Multiple choice)

- A. Java
- B. Node.js
- C. net
- D. PHP
- E. GO
- F. Python

**Answer:** A,B,C,D,E,F

**NO.36** Which of the following is not a typical application scenario of knowledge graph?

- A. Question answering system
- B. Recommend
- C. Text generation
- D. Model training

**Answer:** D

**NO.37** How many nodes (design specifications) can DWS be expanded to?

- A. 4096

- B. 512
- C. 2048
- D. 1024

**Answer:** A

**NO.38** Which of the following options are the key features of HUAWEI CLOUD distributed database middleware DDM service? (Multiple choice)

- A. Can withstand PB-level data volume, million-level concurrency, ten times as much as a single-machine database connection
- B. Compatible with SQL syntax
- C. The cluster is highly available and can automatically recover from failures in seconds
- D. Uninterrupted business, automatic horizontal split and smooth expansion

**Answer:** A,B,C,D

**NO.39** According to the definition of CNCF, which of the following options are representative technology of cloud native? (Multiple choice)

- A. Declarative API
- B. Service grid
- C. Microservices
- D. Infrastructure automation
- E. Container

**Answer:** A,B,C,D,E

**NO.40** Which of the following scenarios are GeminiDB suitable for? (Multiple choice)

- A. Need to support data models such as documents, wide tables, data structures, time series, etc.
- B. Need super write performance
- C. Requires independent expansion of computing resources and storage resources
- D. Data is required to be redundant across AZ to ensure reliability

**Answer:** A,B,C,D

**NO.41** When setting up a backup strategy, it is best to set the time period for backup execution during the low peak period of the business.

- A. False
- B. True

**Answer:** B

**NO.42** Threshold alarms detect the upper and lower limits set by the indicators defined in the threshold rules. If the trigger conditions are met, an alarm message will be sent and a custom action will be executed. The current alarms on HUAWEI CLOUD can be notified to the operation and maintenance staff through which channels? (Multiple Choice)

- A. WeChat
- B. QQ
- C. Mail

D. SMS

**Answer:** C,D

**NO.43** Huawei Cloud tenants check the RDS audit log, which of the following information can't be found?

A. User's login password

B. SQL statement executed

C. Naming the execution time

D. User Information

**Answer:** A

**NO.44** Assume that a VMware virtual machine allocates 10GB of space, uses 40GB of space during the initial backup, and subsequently adds 5GB of daily data.

When using CBR for backup, which of the following options is the amount of data for the first full backup and subsequent incremental backups?

A. 40GB ; 100GB

B. 100GB ; 5GB

C. 100GB ; 100GB

D. 40GB ; 5GB

**Answer:** D

**NO.45** An ECS virtual machine can only run one container.

A. True

B. False

**Answer:** B
